

1)Activating Event Grid Resource:

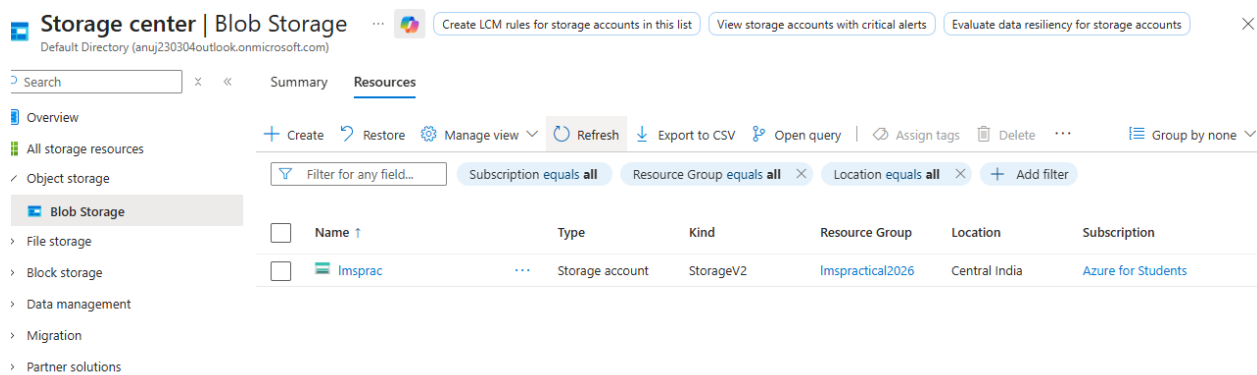

Subscription: Azure for Students | Resource providers

Search: resource

Actions: Register, Unregister, Refresh, Export to CSV, Feedback

Provider	Status	Registration Policy
Microsoft.EventGrid	Registered	RegistrationRequired
Microsoft.EventHub	Registered	RegistrationRequired

2)Creating Storage Account

Storage center | Blob Storage

Default Directory (anuj230304outlook.onmicrosoft.com)

Actions: Create LCM rules for storage accounts in this list, View storage accounts with critical alerts, Evaluate data resiliency for storage accounts

Search:

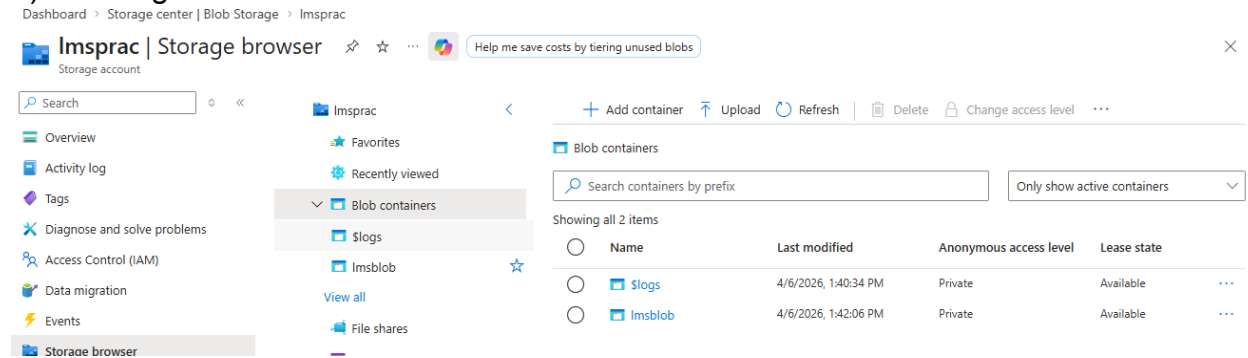

Summary | Resources

Actions: Create, Restore, Manage view, Refresh, Export to CSV, Open query, Assign tags, Delete, Group by none

Filter for any field... Subscription equals all Resource Group equals all Location equals all Add filter

Name	Type	Kind	Resource Group	Location	Subscription
Imsprac	Storage account	StorageV2	Imspractical2026	Central India	Azure for Students

3) Creating Blob Container

Dashboard > Storage center | Blob Storage > Imprac

Storage account: Imprac

Help me save costs by tiering unused blobs

Search:

Actions: Add container, Upload, Refresh, Delete, Change access level

Blob containers

Search containers by prefix: Only show active containers

Showing all 2 items

Name	Last modified	Anonymous access level	Lease state
\$logs	4/6/2026, 1:40:34 PM	Private	Available
Imsblob	4/6/2026, 1:42:06 PM	Private	Available

4) Creating Logic App

8) Created Topic

The screenshot shows the configuration page for the Event Grid Topic 'Imspracticaltopic'. The left sidebar contains navigation links: Overview, Activity log, Access control (IAM), Tags, Resource visualizer, Settings, Entities, Monitoring, Automation, and Help. The main content area is divided into 'Essentials' and 'JSON View' tabs. The 'Essentials' tab displays the following details:

- Resource group: [\(move\)](#) [Imspractical2026](#)
- Status: Active
- Location: Central India
- Subscription: [\(move\)](#) [Azure for Students](#)
- Subscription ID: 091bd188-d92a-43f7-baea-bf20120f6f76
- Tags: [\(edit\)](#) [Add tags](#)
- Kind: Azure
- Topic Endpoint: <https://Imspracticaltopic.centralindia-1.eventgrid.azure.net/api/events>
- Local Authentication: [Enabled](#)
- Pricing tier: Basic
- Availability zones: Enabled

9) Creating Topic Event Grid Triggers in logic App

The screenshot shows the Logic App Designer interface for a logic app named 'Imspraclogicapp'. The left sidebar contains navigation links: Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Resource visualizer, Development Tools, Logic app designer, Logic app code view, Logic app templates, Run history, Chat (Preview), Versions, API connections, Quick start guides, Settings, Monitoring, Automation, and Help. The main canvas displays a workflow with two steps:

- When an HTTP request is received (Trigger)
- Publish Event (Action)

The 'Publish Event' action is selected, and its configuration is shown in the right-hand pane. The 'Parameters' tab is active, displaying the following JSON payload:

```
[
  {
    "id": "f3ef5e11-7849-4f2d-94fa-032950e200f8",
    "subject": "lms_grid_topic",
    "eventType": "lms_grid_topic",
    "data": "Anuj"
  }
]
```

The 'Outputs' section shows the 'Status Code' as 200. The 'Headers' section displays the following table:

Key	Value
Strict-Transport-Security	max-age=31536000; includeSubDomains

At the bottom of the canvas, there is a 'Run draft' button and a 'Properties' icon.

10) Created A Web based Hook for the topic:

Home

Imspracticaltopic Summarize the properties of this Event Grid Topic. +2

11) Web Hook based trigger Log in logic app based action:

The screenshot shows the Azure Logic App 'Imswebhook' interface. The left sidebar contains navigation options: Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Resource visualizer, Development Tools (Logic app designer, Logic app code view, Logic app templates, Run history, Chat (Preview), Versions, API connections, Quick start guides), Settings, Monitoring, Automation, and Help. The main area displays the 'Run history' tab, showing a table of recent runs. Above the table, there are tabs for 'Get started', 'Run history' (selected), 'Trigger history', and 'Metrics'. A 'Resubmit' button and an 'Add filter' dropdown are also visible. The table lists four successful runs with their identifiers, status, start times, and durations.

Identifier	Status	Start time (Loc...	Duration	Static Res
08584261376339322775633230219C	Succeeded	4/6/2026, 3:24:11 F	277 Milliseconds	
08584261380868245537649115736C	Succeeded	4/6/2026, 3:16:38 F	334 Milliseconds	
08584261381455335524873838609C	Succeeded	4/6/2026, 3:15:39 F	107 Milliseconds	
08584261381885570506290684612C	Succeeded	4/6/2026, 3:14:56 F	286 Milliseconds	

12) Created Queue for the Multi User Subscription:

The screenshot shows two Azure Storage interfaces. On the left is the 'Storage center | Blob Storage' page, displaying a list of storage resources under 'Blob Storage'. On the right is the 'Imsprac | Storage browser' page, showing a 'multiuserqueue' under the 'Queues' section. The 'Authentication method' is set to 'Access key'. Below the queue name, it says 'Showing all 0 items' and 'No items found'.

13)Multi User Creation within the Web Hook
