

## 1)Create Vnet:

### Create virtual network ...

Basics   Security   IP addresses   Tags   Review + create

Configure your virtual network address space with the IPv4 and IPv6 addresses and subnets you need. [Learn more](#) 

Define the address space of your virtual network with one or more IPv4 or IPv6 address ranges. Create subnets to segment the virtual network address space into smaller ranges for use by your applications. When you deploy resources into a subnet, Azure assigns the resource an IP address from the subnet. [Learn more](#) 

☐ Allocate using IP address pools. [Learn more](#) 

[+](#) Add a subnet

10.0.0.0/16

10.0.0.0

/16

10.0.0.0 - 10.0.255.255

65,536 addresses

Delete address space

| Subnets | IP address range | Size | NAT gateway |
|---------|------------------|------|-------------|
|---------|------------------|------|-------------|

Add IPv4 address space |

3)Subnet Created

## Add a subnet

select services later. [Learn more](#)

Subnet purpose ⓘ Default

Name \* ⓘ lms-subnet

### IPv4

Include an IPv4 address space ☒

IPv4 address range ⓘ 10.0.0.0/16

10.0.0.0 - 10.0.255.255

Starting address \* ⓘ 10.0.0.0

Size ⓘ /28 (16 addresses)

Subnet address range ⓘ 10.0.0.0 - 10.0.0.15

### IPv6

Include an IPv6 address space ☐ This virtual network has no IPv6 address ranges.

### Private subnet

Private subnets enhance security by not providing default outbound access. To enable outbound connectivity for virtual machines to access the internet, it is necessary to explicitly grant outbound access. A NAT gateway is the recommended way to provide outbound connectivity for virtual machines in the subnet. [Learn more](#)

Enable private subnet (no default outbound access) ☒

**i** After March 31, 2026, private subnet will be the default selection for new virtual networks. [Learn more](#)

## 4)Get Subnet:

| <input type="checkbox"/> | Name ↑     | IPv4        | IPv6 | Available IPs | Delegated to | Security group | Route table |  |  |
|--------------------------|------------|-------------|------|---------------|--------------|----------------|-------------|--|--|
| <input type="checkbox"/> | lms-subnet | 10.0.0.0/28 | -    | 11            | -            | -              | -           |  |  |

Got only 11 ip address as 5 are occupied by Vnet only.
