

1) Created the dedicated sql server pool:

SQL pools			
The serverless SQL pool, Built-in, is immediately available for your workspace. Dedicated SQL pools can be configured to adapt to team or organizational requirements and constraints. Learn more			
+ New Refresh			
Filter by name			
Showing 1-2 of 2 items (1 Serverless, 1 Dedicated)			
Name	Type	Status	Size
Built-in	Serverless	Online	Auto
dedicatedserver2026	Dedicated	Online	DW100c

2) Created the RBAC for the synapse to access the data directories:

	f039a98a-20af-4202...	Storage Blob Data Contributor	This resource	Add
	synapse-workspace-d93a059f-1596-47...	Managed identity	Storage Blob Data Contributor	This resource
	synapse-workspace-d93a059f-1596-47...	Managed identity	Storage Blob Data Contributor	Resource group (Inherited)

3) Created master key and related database :

managed_identity

external_source

file_format

target

Run Undo Publish Query plan

Connect to dedicatedserver2026

```
1 CREATE MASTER KEY
2 CREATE DATABASE SCOPED CREDENTIAL my_cred
3 WITH IDENTITY = 'Managed Identity';
4
```

4) Created the External Source for the data transferring:

1	CREATE EXTERNAL DATA SOURCE my_data_src
2	WITH (
3	TYPE = HADOOP,
4	LOCATION = 'abfss://data@synapsedatalake2026.dfs.core.windows.net/',
5	CREDENTIAL = my_cred
6	);

5) Created the File Format for the file parsing:

```
managed_identity • external_source • file_format • target_table • data_load
Run Undo Publish Query plan Connect to dedicatedserver2026 Use database dedicatedserver2026
1 CREATE EXTERNAL FILE FORMAT my_csv_format
2 WITH (
3     FORMAT_TYPE = DELIMITEDTEXT,
4     FORMAT_OPTIONS (
5         FIELD_TERMINATOR = ',',
6         STRING_DELIMITER = '"',
7         FIRST_ROW = 2
8     )
9 );
```

6) Created the target table:

```
managed_identity • external_source • file_format • target_table • data_load
Run Undo Publish Query plan Connect to dedicatedserver2026 Use database dedicatedserver2026
1 CREATE TABLE dbo.customers (
2     id INT,
3     name VARCHAR(100),
4     city VARCHAR(100)
5 )
6 WITH (
7     DISTRIBUTION = ROUND_ROBIN,
8     HEAP
9 );
```

7) Transfer data into the table:

```
1 COPY INTO dbo.customers
2 FROM 'https://synpasedatalake2026.blob.core.windows.net/synpase-file-system/data/cust2.csv'
3 WITH (
4     FILE_TYPE = 'CSV',
5     CREDENTIAL = (IDENTITY= 'Managed Identity'),
6     FIELDTERMINATOR = ',',
7     FIRSTROW = 2
8 );
```

8) Test Script :

The screenshot shows a SQL query execution interface. At the top, there are tabs for 'managed_query', 'external_source', 'file_format', 'target_table', and 'data_load'. Below these is a toolbar with 'Run', 'Undo', 'Publish', 'Query plan', 'Connect to' (showing 'dedicatedserver2026'), and 'Use database' (showing 'dedicatedserver2026'). The query editor contains the following SQL query:

```
1 select * from [dbo].[customers]
```

Below the query editor, there are tabs for 'Results' and 'Messages'. The 'Results' tab is active, and it shows a table view of the query results. The table has three columns: 'id', 'name', and 'city'. The results are as follows:

id	name	city
1	Aarav Sharma	Ahmedabad
5	Vikram Singh	Jaipur
3	Rohan Mehta	Mumbai
4	Simran Kaur	Delhi
2	Meera Patel	Surat
6	Ananya Desai	Pune
8	Priya Shah	Ahmedabad
10	Isha Joshi	Hyderabad
9	Karan Verma	Chennai
7	Arjun Nair	Bengaluru
