5) Test by making pipeline in ADF:

The screenshot displays the Azure Data Factory (ADF) console interface. At the top, the 'Data Factory' tab is active, showing a 'Validate all' button and a 'Publish all' button with a notification icon. Below this, the 'pipeline1' tab is selected, showing a visual representation of the pipeline with a single activity named 'Copy data1'. The activity is represented by a blue cube icon and a green checkmark, indicating it has been validated successfully. The pipeline is shown as a single step in a sequence, with a plus sign and a minus sign on the right side of the canvas for adding or removing activities.

Below the pipeline canvas, the 'Output' tab is selected, displaying the results of the pipeline run. The 'Pipeline run ID' is 'd03de2d5-1577-4593-b86c-b861008996a0', and the 'Pipeline status' is 'Succeeded'. The 'All status' dropdown is set to 'All status'. The 'Monitor in Azure Metrics' and 'Export to CSV' options are available. The table below shows the details of the pipeline run, including the activity name, status, start time, duration, integration runtime, and user properties.

Activity name	Activity status	Activity name	Run start	Duration	Integration runtime	User properties	Activity ID
Copy data1	Succeeded	Copy data	4/16/2026, 6:06:02 PM	15s	AutoResolveIntegrationRuntime (Central India)		f71c620f-
