Assign Contributor Role to Developer Group

Add role assignment

RoleMembersConditionsReview + assign

A role definition is a collection of permissions. You can use the built-in roles or you can create your own custom roles. [Learn more](#)

Copilot can help pick a role

Job function rolesPrivileged administrator roles

Grant privileged administrator access, such as the ability to assign roles to other users.

Can a job function role with less access be used instead?

Set Up Multi-Factor Authentication (MFA)

✔ Multifactor authentication is enforced for all users in the directory Default Directory.

Multifactor authentication (MFA) is required for all users signing into [Azure portal](#), [Entra admin center](#), [Intune admin center](#) and [M365 Admin center](#). Detail can be viewed at [aka.ms/mfaforazure](#).

As an administrator, the furthest date you could have postponed to was September 30, 2025 UTC.

All users in your tenant are now required to use MFA to sign into the preceding portals. Users that have not set up MFA when the enforcement began will be redirected to set up MFA in order to log in. There will be no effect for users that already sign in using MFA.

Directory	Default Directory (47918733-bb26-49bf-9ae7-d34ffe2f81ab)
Enforcement status	Enforced

Multi-factor authentication is enforced for all users
