

Azure Lifecycle Management

Details

Base blobs

Lifecycle management uses your rules to automatically move blobs to cooler tiers or to delete them. If you create multiple rules, the associated actions must be implemented in tier order (from hot to cool storage, then archive, then deletion).

Lifecycle Management Rules for Base Blobs:

- Rule 1: If base blobs haven't been modified in 30 days → Move to cool storage
- Rule 2: If base blobs haven't been modified in 90 days → Move to archive storage
- Rule 3: If base blobs haven't been modified in 365 days → Delete the blob
