2) Create function logic and test it locally:

The screenshot displays the Azure Functions portal interface for a function named `http_trigger`. The top navigation bar includes links for Save, Discard, Refresh, Test/Run, Get function URL, Disable, Delete, Upload, Resource JSON, and Send us your feedback. Below the navigation bar, the breadcrumb path is `Imsfunction / http_trigger / index.js`.

The code editor shows the following JavaScript code:

```
1 module.exports = async function (context, req) {
2     const name = req.query.name || (req.body && req.body.name);
3
4     if (name) {
5         context.res = {
6             status: 200,
7             body: `Hello ${name}, welcome to Azure Functions!`
8         };
9     } else {
10        context.res = {
11            status: 200,
12            body: "Please provide a name in the query string or in the request body."
13        };
14    }
15};
```

Below the code editor, the breadcrumb path is `Home > Imsfunction`, followed by the function name `http_trigger | Code + Test`. The `Code + Test` tab is selected, showing the same code as above. The other tabs are Integration, Function Keys, Invocations, Logs, and Metrics.

At the bottom, the `Logs` tab is selected, displaying the following log entries:

```
2026-04-08T07:35:36.310 [Information] Executed 'Functions.http_trigger' (Succeeded, Id=0037b493-d297-49ce-a7d6-adbb536967eb, Duration=3ms)
2026-04-08T07:35:40.372 [Information] Executing 'Functions.http_trigger' (Reason='This function was programmatically called via the host APIs.', Id=98b3fdd1-aa85-47b9-8b4e-0249172c34ab)
2026-04-08T07:35:40.375 [Information] JavaScript HTTP trigger function processed a request.
2026-04-08T07:35:40.376 [Information] Executed 'Functions.http_trigger' (Succeeded, Id=98b3fdd1-aa85-47b9-8b4e-0249172c34ab, Duration=3ms)
2026-04-08T07:37:08 No new trace in the past 1 min(s).
2026-04-08T07:38:08 No new trace in the past 2 min(s).
2026-04-08T07:39:08 No new trace in the past 3 min(s).
```

3) Setup URLs and check logic with passing parameter and without it:

```
https://lmsfunction-  
gcekepfjejc7b7a6.centralindia-01.azurewebsites.net/api/http_trigger?  
code=ufDJqigUE_sVMTWHdvBHFwRGAXAN9Cn1qgnsGkDAkYA0AzFuwj1ucw==&name=Anuj
```

Get Function URL

_master (Host key)

https://lmsfunction-gcekepfjejc7b7a6.centralindia-01.azurewebsites.net/api/http_trigg...

default (Function key)

https://lmsfunction-gcekepfjejc7b7a6.centralindia-01.azurewebsites.net/api/http_trigg...
